# 3S SOLIDWORKS

3DEXPERIENCE®

WHAT'S NEW IN SOLIDWORKS® 2021— DATA MANAGEMENT
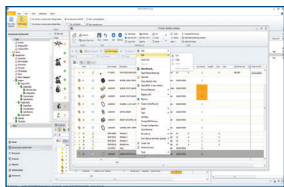

SOLIDWORKS Manage

1 Share File

- File data can be shared with users who do not have direct access to system
- Ability to share files via web page link or email message; link is time-based and can be set to expire as desired

Benefits

Share file data with external users in efficient and controlled manner.

---

2 Bill of Materials Editing

- Host of new features for editing bills of materials
- New features include Cut, Copy and Paste of line items, dissolving subassemblies and replacing items with new or copied records

Benefits

Save significant amount of time when modifying bill of materials for use by other fields, like manufacturing.
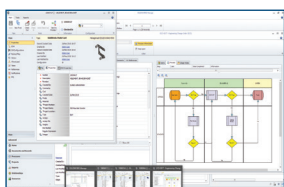

---

3 Project Lists

- New Project List feature added to group multiple projects in single view for greater control over managing projects

Benefits

Streamline project management when multiple projects are connected to common project manager or program.

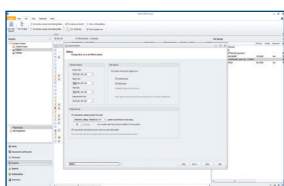

4 Modeless Windows

- Ability to open multiple property card windows and switch between them for editing and data gathering

Benefits

Interact more effectively with multiple records, using much less effort.

---

5 Automated Project Updating

- New data service automatically updates project stage progress, resources and deliverables from related task data at specified time interval

Benefits

Avoid need to update information on project-by-project basis.
